

E-Safety Policy

Date Reviewed: September 2022

Date for Policy review: September 2023

GENERAL INTRODUCTIONS

The e-Safety Policy works in conjunction with The Axis Academy's other policies including those for bullying and for child protection. The school has appointed Lorna Lockhart as the Designated Safeguarding Lead and works in conjunction with Grace Booth as an e-Safety coordinator. Our e-Safety Policy has been written by the school, and has been agreed by the Senior Leadership Team and approved by the school's Local Support and Scrutiny Board (LSSB).

TEACHING AND LEARNING

Why the Internet and digital communications are important

- The Internet is an essential element in 21st century life for education, business and social interaction. The school has a duty to provide students with high-quality Internet access as part of their learning experience.
- Internet use is a part of the statutory curriculum and a necessary learning tool for staff and students.

Internet use will enhance and extend learning

- The school Internet access is designed expressly for student use and will include filtering appropriate to the age of students.
- Clear boundaries are set for the appropriate use of the Internet and digital communications and discussed with both staff and students.
- Students are educated in the effective use of the Internet in research, including the skills of knowledge location, retrieval and evaluation.

Students will be taught how to evaluate Internet content

- The e-Safety co-ordinator, where possible, will ensure that the use of Internet derived materials by both staff and by students complies with copyright law.
- Students should be taught to be critically aware of the materials they read and shown how to validate information before accepting its accuracy.

User names and passwords

- When joining the school, all students will be allocated a user name and password for access to the school network. It is each student's

responsibility to ensure that nobody else becomes aware of their password.

MANAGING INTERNET ACCESS

Information system security

- School ICT system security will be reviewed regularly by the school's IT management operators.
- Virus protection will be installed and updated regularly.
- Security strategies will be discussed, where necessary, with the school's LSSB.

E-mail

- Students may only use approved e-mail accounts on the school system.
- Students must immediately tell either a member of the IT department, e-safety co-ordinator or their teacher if they receive offensive e-mail.
- In e-mail communication, students must not reveal their personal details or those of others, or arrange to meet anyone without specific permission.
- Incoming e-mail should be treated as suspicious and attachments not opened unless the author is known and the attachment is expected.
- The school will regularly review how e-mail from students to external bodies is presented and controlled.
- The forwarding of chain letters is not permitted.

Published content and the school web site

- Staff or student personal contact information will not generally be published. The contact details given online should be the school office.
- The e-Safety coordinator responsible for ICT will take overall editorial responsibility and ensure that published content is accurate and appropriate.
- Staff are expected and required to ensure that any material posted only reflects the outstandingly positive nature of the school. This includes (but is not limited to) photos of the learning environment, and any online comments or communications. This also applies to any personal social media accounts while the member of staff is employed by the school.

Publishing students' images and work

- Photographs that include students will be selected carefully so that individual students cannot be identified or their image misused.

- Students' full names will not be used anywhere on a school Website or other on-line space, particularly in association with photographs.
- Written permission from parents or carers will be obtained before photographs of students are published on the school Website.
- Work can only be published with the permission of the student and parents/carers, which is sought in the Home - School Agreement.

Social networking and personal publishing

- The school will control access to social networking sites, and will educate students in their safe use.
- Newsgroups will be blocked unless a specific use is approved.
- Students will be advised never to give out personal details of any kind which may identify them, their friends or their location.
- Students should not place personal photos on any social network space without considering how the photo could be used now or in the future.
- Students should be advised on security and encouraged to set passwords, to deny access to unknown individuals and to block unwanted communications. Students should only invite known friends and deny access to others.
- No employee of the school may have contact with a student on social media, or any personal device or account, unless specifically required by their role and ratified by the Headteacher in writing.
- Staff members should take reasonable steps obscure their identity online to make it harder for students to locate their profiles.
- Staff may not post any references to any students of the school via personal social media, nor post anything that could be interpreted as reflecting the school negatively.

Managing filtering

- If staff or students discover an unsuitable site, it must be reported to the e-Safety Coordinator or a member of SLT.
- The e-Safety coordinator responsible for ICT will ensure that regular checks are made to ensure that the filtering methods selected are appropriate, effective and reasonable.

Managing videoconferencing

- Students should ask permission from the supervising teacher before making or answering a videoconference (Microsoft Teams) call.
- Videoconferencing will be appropriately supervised for the students' age.

- Teachers will attempt to dial students into lessons using Microsoft Teams, if and when appropriate. Students will have their own school email address and only school accounts are permitted to be used.

MANAGING EMERGING TECHNOLOGIES

- Emerging technologies will be examined for educational benefit and a risk assessment will be carried out before use in school is allowed.
- Mobile phones will not be used during lessons or formal school time unless under the direct supervision of a member of staff. The sending of abusive or inappropriate text messages is forbidden.
- The use by students of cameras in mobile phones will not be permitted in school.
- No student-owned devices will be allowed on the school network.

PROTECTING PERSONAL DATA

- Personal data will be recorded, processed, transferred and made available according to the Data Protection Act 1998.
- No student/staff personal data must be stored on any removable device unless encrypted or uses a password.
- Printing will be PIN-locked to ensure confidentiality of produced documents.

POLICY DECISIONS

Authorising Internet access

- All staff must read and sign the 'Staff Code of Conduct for ICT' before using any school ICT resource. Staff must ensure that a signed copy of the agreement is in the possession of the e-Safety co-ordinator.
- The school will maintain a current record of all staff and students who are granted access to school ICT systems.
- All students must apply for Internet access individually by agreeing to comply with the Responsible Internet Use statement.

Assessing risks

- The school will take all reasonable precautions to prevent access to inappropriate material. However, due to the international scale and linked nature of Internet content, it is not possible to guarantee that unsuitable material will never appear on a computer connected to the school network. Neither the school nor The YES Trust can accept liability for any material accessed, or any consequences of Internet access.
- The school will audit ICT use to establish if the e-safety policy is adequate and that the implementation of the e-safety policy is appropriate and effective.

Handling e-safety complaints

- Complaints of Internet misuse will be dealt with by a senior member of staff.
- Any complaint about staff misuse must be referred to the Headteacher.
- Complaints of a child protection nature must be dealt with in accordance with school child protection procedures.
- Students and parents will be informed of the complaints procedure.
- Discussions will be held with the Police to establish procedures for handling potentially illegal issues.

COMMUNICATING E-SAFETY

Introducing the e-safety policy to students

- Students will be informed that network and Internet use will be monitored.
- A programme of training in e-Safety will be included in the IT Induction lessons at KS3 and KS4.

Staff and the e-Safety policy

- All staff will be given the School e-Safety Policy and its importance explained.
- Staff will be informed that network and Internet traffic can be monitored and traced to the individual user. The internet should only be used in school where the individual's specific use is necessary to enable them to carry out their work in school.
- Staff that manage filtering systems or monitor ICT use will be supervised by senior management and work to clear procedures for reporting issues.
- Staff should ensure that any IT equipment provided by the school remains the property of the school at all times and should only be used for the purpose(s) it is intended for.
- Staff should understand that phone or online communications with students can occasionally lead to misunderstandings or even malicious accusations. Staff must take care always to maintain a professional relationship and should not communicate online with students in any way other than for school purposes – e.g. for the submission of assignments, etc.
- Staff should not use Facebook or any other social networking site to communicate with students. They must ensure that the use of Facebook, etc. is restricted so that students cannot gain access to their profile.

Enlisting parents' and carers' support

- Parents' and carers' attention will be drawn to the School e-Safety Policy in newsletters and on the school Website.
- The school will maintain a list of e-safety resources for parents/carers.
